CONSIGLI PER LA POSA E LA PULIZIA TIPS FOR LAYING AND CLEANING / CONSEILS POUR LA POSE ET LE NETTOYAGE VERLEGE- UND REINIGUNGSTIPPS / РЕКОМЕНДАЦИИ ПО УКЛАДКЕ И ЧИСТКЕ ПО УКЛАДКЕ

La posa del prodotto rettificato a giunto accostato, non unito, richiede una maggiore attenzione e precisione da parte dell'installatore sia per quanto riguarda la planarità del piano di posa sia per la continuità delle fughe. Per un effetto ottimale della posa, Gruppo Romani suggerisce di mantenere almeno 2 mm di fuga.
Procedere con cautela a stuccare con malta i giunti ("fughe"), applicando con prudenza e con cura, poiché questi metalli preziosi e nobili non si uniscono chimicamente allo smalto, ma aderiscono solamente alla superficie.
Per la pulizia sono da evitare assolutamente prodotti abrasivi gli acidi o gli alcali concentrati: la decorazione non resisterebbe. L'impiego di alcool o acqua addizionata di un detergente molto leggero abituale per i tipi di stoviglie delicate non altera né lo splendore del decoro, né la bellezza della piastrella. Caratteristica degli smalti a riflesso (lustri) è la variabilità del punto di colore.

The laying of ground products with joints that are close but not joined requires greater care and accuracy by the installer both as regards the planarity of the laying surface and the continuity of the joints. For an optimal effect of the laying, Gruppo Romani suggests to maintain at least a joint of 2 mm. Fill with caution the joints with mortar and apply it with caution and care, since these precious and noble metals do not chemically bond with the glaze, but adhere only to the surface.
Abrasive products, concentrated acids or alkalis must be absolutely avoided for cleaning; the decoration would not resist to them. The use of alcohol or water with the addition of a usual light detergent for sensitive dishware does not alter the shine of the decoration or the beauty of the tile. Reflecting glazes (lustres) are characterised by the variability of the hue.

L'installation du produit rectifié avec joints proches mais qui ne se rejoignent pas nécessite d'une plus grande attention et précision de la part de l'installateur tant en ce qui concerne la planéité de la surface de pose que la continuité des joints. Pour un effet optimal de la pose, Gruppo Romani suggère de maintenir au moins 2 mm de joint.
Remplissez avec prudence les joints avec du mortier et appliquez-le avec attention et avec soin, car ces métaux précieux et nobles ne se lient pas chimiquement à l'émail, mais n'adhèrent qu'à la surface. Pour le nettoyage, les produits abrasifs, les acides concentrés ou les alcalis doivent être absolument évités: la décoration n'y résisterait pas. L'utilisation d'alcool ou d'eau avec l'ajout d'un détergent léger habituel pour la vaisselle délicate ne modifie pas la splendeur de la décoration ou la beauté du carrelage. La caractéristique des émaux réfléchissants (lustres) est la variabilité de la tonalité de la couleur.

Das Verlegen des rektifizierten Produkts mit einer nicht fugenfreien Stoßverbindung erfordert eine größere Aufmerksamkeit und Präzision, sowohl was die Ebenheit der Verlegefläche als auch die Kontinuität der Fugen anbelangt. Um einen optimalen Verlegeeffekt zu erzielen, empfiehlt Gruppo Romani Fugen von mindestens 2 mm.
Die Verbindungen („Fugen“) behutsam und sorgfältig mit Mörtel füllen, da sich diese noblen Edelmetalle nicht chemisch mit der Glasur verbinden, sondern nur an der Oberfläche haften. Bei der Reinigung unbedingt Schleifmittel wie Säure- oder Alkalikonzentrate vermeiden: Das Dekor würde darunter leiden. Die Verwendung von Alkohol oder Wasser unter Zusatz eines sehr leichten Reinigungsmittels für empfindliches Geschirr beeinträchtigt weder den Glanz des Dekors noch die Schönheit der Fliesen. Eine Eigenschaft der reflektierenden Glasuren (Lüster) ist die Variabilität des Farbpunkts.

Укладка со швом, а не встык, обрезного продукта требует от плиточника больше внимания и точности при выполнении работ, как для обеспечения ровности поверхности укладки, так и непрерывности швов. Для получения наилучшего результата укладки Gruppo Romani рекомендует выполнять шов шириной не менее 2 мм.
При заполнении (межплиточных) швов затиркой необходимо действовать аккуратно, тщательно и точно наносить его, потому что драгоценные металлы не вступают в химическую реакцию с глазурью, а лишь только лежат на ее поверхности. Для очистки следует категорически избегать использования абразивных средств, концентрированных кислот или щелочей, так как они испортят декор. Наоборот, использование спирта или водного раствора легкого моющего средства для деликатной посуды не влияет ни на блеск декора, ни на красоту плитки. Отражающие (блестящие) глазури характеризуются изменчивостью цветового оттенка.
